### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Objections*

1. Claims 5 and 6 are objected to because of the following informalities: Claim 6 should be separated from claim 5. Please see claim 5, line 4. Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Kondoh et al. (6,323,447).

Kondoh et al. teaches and electrical switch comprising:

a first conducting droplet 321 (figs. 8 and 9) having a first voltage;

a second conducting droplet 322 having a second voltage;

a means 311 (comprising of 311 and 312) for reversibly contacting the first and the second droplet by providing a voltage differential (to line I1 and I2) to a first electrode 351 and a second electrode 352.

Regarding claim 3, the first electrode 351 is electrically insulated from the first droplet.

Regarding claim 4, second voltage provided to a second electrode 352. The second electrode 352 is electrically insulated from the second droplet.

Regarding claim 5, the means for reversing 311 is a heat source (heated by electrode 351).

Art Unit: 2832

Regarding claims 6-8, a first fluid 381 surrounds 321 and a second fluid 382 surrounds 322 (fig. 9).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kondoh et al. Kondoh et al. teaches the claimed invention except for the method of using the switch device. Steps of use as claimed are deemed obvious in view of the functions of the structure in the combination discussed above.
